

Stellschrauben an den Ecken zur Nivellierung der Abdeckung bis ca. 10 cm

Eingelassener Erdanschluss

Alle Metallteile sind auf Erdungspunkt M12 geführt

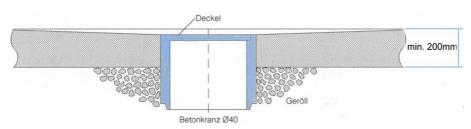

Seitlich eingelassene Schienen für die Anbringung von Schnellverlegern

Praktische Kabeleinführung:
allseitig armierungsfreie Ausbrechwände
oder auf Wunsch eingegossene Endmuffen

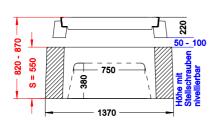

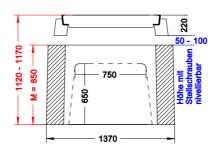

Das Bodenfundament ist bauseits Zu erstellen. Wir empfehlen eine Entwässerung in Form eines Sumpfschachtes.
